Exportation of Frozen Canine Semen from GlenBred, New Zealand

Thank you for your interest in exporting frozen semen from New Zealand. We endeavor to make an often-complicated process stress free for you, by handling all necessary paper work.

Semen frozen for export must meet the requirements of the importing country, therefore the first step in the export process will be to determine what test and conditions need to be met prior to, during and after the collection process. If you already have semen frozen then please contact us so we can determine if it can be exported to the country of choice.

Once we have determined the semen's eligibility and received permission from the Stud dog owner to dispatch the semen the following process will be taken:

- 1) GlenBred will obtain and complete the required export certificate and accompanying paper work.
- 2) GlenBred will make contact with the importer to obtain any special shipping requirements including address, agent details, and preferred shipping carrier.
- 3) Paper work will be sent through to importer for approval
- 4) Container will be packed, and sent via our agent with MAF paper work for export.

We can only proceed with the export once a **deposit of \$450.00 (incl. GST) is received** and any collection, freezing and storage fees have been paid for. We will ask that you send this deposit along with the signed Export Terms and Conditions prior to the semen leaving New Zealand.

Costs: We advise clients to allow between \$1500 and \$2000 to cover the export costs. This is made up of a set GlenBred administration fee of \$450 (incl. GST) per client and variable fees including MAF fees, export fees, taxes, international agent's fees, customs duties and freight. An invoice for these variable fees will be forwarded after GlenBred has received all associated costs (normally within a week or two of the shipment leaving New Zealand). There will be fees associated with the clearance of the semen upon arrival in the importing country and the return of the container to New Zealand - please contact the importer to discuss these fees.

Fee	Cost
Administration and Handling	\$400.00
Container Hire (1 st 14 days)	\$142.22 (+ \$25.00 per day thereafter)
Liquid Nitrogen	\$110.25
Freight, MAF/Customs/Agents Fees, Insurance*	\$100.00 - \$600.00

*These fees are variable and will be invoiced once the semen has been exported and all associated costs have been received.

Insurance: The semen owner will be responsible for insurance of the semen whilst in transit.

Please note:

- We recommend **shipping as much semen as possible** at once as it will cost the same to export one straw as it would to export 100 straws.
- We also recommend that plenty of notice be given of your intentions to export semen so that where possible shipments can be combined to make the process more economical for all involved.
- Please allow at least **4 weeks** for the organisation of an **international shipment** of semen.
- Please contact us to confirm that export requirements have been met prior to the international dispatch of semen.
- **All contracts and stud fees are to be negotiated between you as the bitch/new semen owner and stud dog owner directly.**
- Please be aware that the GST is the responsibility of the semen owner.

All fees are GST exclusive and are subject to change as costs are reviewed on a regular basis.

Thank you for your enquiry. Please do not hesitate to contact us if you have any further questions.

Kind Regards

Victoria Weston
