

VETERINARY STUDENTS SEEING PRACTICE APPLICATION FORM

Welcome to Matamata Veterinary Services. We expect your visit to our practice to be rewarding and beneficial to your undergraduate study program. We believe that having students observe practice must be a positive learning experience for both the undergraduate student and for the veterinarians at MVS.

At MVS we will endeavor to expose you to as much clinical practice as possible, but this will be determined by the time of the year you are with us.

Whilst our veterinarians will make every endeavour to educate students we do have professional obligations to our clients.

- Working with the Dairy Team you will gain experience in large animal/farm medicine and surgery. During the calving period you will be exposed to and in some cases, have the opportunity to participate in obstetric cases. You will be involved with discussions on pre and post calving metabolic disease issues as faced by the Dairy Industry. On request, specific students may be involved with Dairy Herd Nutritional Farm Management programs run by MVS for their clients.

The Companion Animal Team will provide an insight to routine small animal practice, involving cat and dog medicine and surgery. On request students interested in Canine Reproduction may have the opportunity to spend time under the supervision of a registered Small Animal Reproduction Specialist.

Please complete the following form and e mail to bronwyn@matavet.co.nz, or fax to 07 888 6008.

Previous experience with hosting students at MVS has taught us that not all students have the same goals when seeing practice. Therefore, priority will be given to applicants who plan to have a long-term future in mixed rural practice in New Zealand.

In order for both students and our practice to achieve a productive outcome during the placement, please include a letter of introduction. Ensure you provide us with details about yourself, your professional interest areas and the goals you have set to achieve while at MVS.
